Introduction

This synthetic case narrative is prepared for land-litigation information retrieval testing. It is not an official court record.

Facts alleged in the petition

The petitioner alleges that access to the parcel identified as Survey No. 78/3A is obstructed or disputed and seeks recognition or protection of a claimed route. The alleged route is fictional.

Response of the respondent

The respondent disputes the route as described and contends that its location, historic use, and legal basis would require evidence rather than assumption.

Issues for consideration

The illustrative questions are whether the claimed route can be identified, what evidence supports its use, and which forum may consider the relief sought.

Material and evidence referred to

The synthetic materials refer to the Chitta entry for Patta No. 60 and a hypothetical pathway sketch. No actual easement document or field inspection is claimed.

Discussion

A pathway claim requires careful verification of location and legal basis. A land-record reference alone does not establish a right of way.

Findings

The route and alleged obstruction remain disputed in this fictional scenario; no real easement or right of way is declared.

Order / procedural status

For this synthetic dataset, the matter is marked as pending; this is not an actual court order.

Data provenance and AI use

Case ID, narrative, parties' allegations, hearing events, status, and outcome are synthetic. Village, survey/subdivision reference, and party-name strings are drawn from the supplied land-record documents where readable. official_record=NO; provenance=SYNTHETIC.
